My name is suranjana chowdhury. The meaning of my name loosely translates to pleasing person. It was my mother who chose a complex name. I was born on 5th August 1994 in the city of kolkata ,India which is located on the eastern side of India. I went to a school called rainbow and then attended carmel High school. As a kid I loved to draw. My favorite color is green. I still have memories of me going to drawing class on sunday ,surrounded by plants ,nature and a rabbit running around.

After completing school I chose computer science and Engineering and did my B.Tech before moving to Bangalore also known as the Silicon Valley of India. I worked as a developer in Envestnet Yodlee which was a fintech company . I worked with several clients like Bank of America, Harris, Citi on Personal Finace Management, Credit lending etc. Then I worked for Dana while working for a startup called phasezero AI on an application called Tireapp. Lastly I worked with Hewlett packard while working for Teksystem . I worked on CDO application designing API's and then handled the EDW to TERA migration for Pricing Analytics.

After working for almost 6 years I started my masters from Georgia State University in Data Science and Analytics. Little did I know then that I 'll see GPT's and AI progressing so rapidly!

After working for so many years it was difficult to come back to college and sit and study. I got a new perspective on life.

A few things that others don't know about me is that I am an introvert person who loves travelling,social networking and utilizing time preciously. My favorite author is Oscar Wilde and I have an elephant's memory. I love technology and I am an optimistic person. In spite of loving technlogy I love everything vintage too. At times I feel like I am an old soul trapped in a young body.

A fun thing about me is that when I moved to USA I found everything to be too big. The roads are double the size of india, food comes in large potions ,landmass is huge.

When I am not working or bored I play with my pet Padfoot a black lab mix. Padfoot is a dog but has the attitude of a cat ! Also I love spending time with my family.

A bad trait about me is that I don't know how to give up.

My favorite quote is "Whatever happens ,happens for good".

A black mirror episode that I want to be real is San Junipero .
